BEGINNER	3 Days / Week	45 Minutes / Session

HARDWARE ARSENAL (INVENTORY COMPLIANCE)

Adjustable Dumbbells Set [2.5kg, 5kg, 7.5kg, 10kg, 12.5kg, 15kg, 17.5kg, 20kg] • Adjustable Incline/Flat Bench • Doorway Pull-up & Dip Station • Loop & Tube Resistance Bands [5kg, 10kg, 15kg, 20kg, 25kg]

WEEKLY SCHEDULE BLUEPRINT

Day	Session Title	Focus & Muscle Targets	Duration	Volume
Day 1	Full Body - Compound Foundation	Comprehensive total body stimulation & core stabilization	45 mins	5 movements
Day 2	Active Recovery & Mobility	Rest & Muscle Recovery	Rest Day	-
Day 3	Full Body - Compound Foundation	Comprehensive total body stimulation & core stabilization	45 mins	5 movements
Day 4	Active Recovery & Mobility	Rest & Muscle Recovery	Rest Day	-
Day 5	Full Body - Compound Foundation	Comprehensive total body stimulation & core stabilization	45 mins	5 movements
Day 6	Active Recovery & Mobility	Rest & Muscle Recovery	Rest Day	-
Day 7	Active Recovery & Mobility	Rest & Muscle Recovery	Rest Day	-

DAY 1: FULL BODY - COMPOUND FOUNDATION						
Comprehensive total body stimulation & core stabilization ~45 mins 5 Exercises						
#	Movement / Muscle	Hardware	Sets x Reps	Target Load	Rest	Biomechanical Cues & Tempo
1	Incline Dumbbell Press [CHEST]	dumbbell	3 x 10	8 kg	60s	Set bench angle to 30-45 degrees to bias clavicular upper pecs. • Keep wrists neutral and slightly tuck elbows at 45-60 degrees.
2	Dips (Chest Focus) [CHEST]	bodyweight	3 x 10	Bodyweight	60s	Lean torso forward 30 degrees and allow elbows to flare slightly. • Lower until upper arms are roughly parallel to the floor.
3	Push-Ups (Standard / Deficit) [CHEST]	bodyweight	3 x 10	Bodyweight	60s	Maintain rigid plank line from crown of head to heels, squeezing glutes and core. • Lower until chest touches floor, elbows tracking back at 45 degrees.
4	Dumbbell Pullover [CHEST]	dumbbell	3 x 10	8 kg	60s	Rest upper back across bench with hips slightly lower than shoulders. • Hold dumbbell diamond-style with palms flat under top weight plate.
5	Pull-Ups / Chin-Ups [BACK]	bodyweight	3 x 10	Bodyweight	60s	Dead hang start with active shoulders engaged before initiating pull. • Drive elbows down and back to chest, bringing chin cleanly over bar.

DAY 3: FULL BODY - COMPOUND FOUNDATION

Full Body Comprehensive total body stimulation & core stabilization | ~45 mins | 5 Exercises

#	Movement / Muscle	Hardware	Sets x Reps	Target Load	Rest	Biomechanical Cues & Tempo
1	Incline Dumbbell Press [CHEST]	dumbbell	3 x 10	8 kg	60s	Set bench angle to 30-45 degrees to bias clavicular upper pecs. • Keep wrists neutral and slightly tuck elbows at 45-60 degrees.
2	Dips (Chest Focus) [CHEST]	bodyweight	3 x 10	Bodyweight	60s	Lean torso forward 30 degrees and allow elbows to flare slightly. • Lower until upper arms are roughly parallel to the floor.
3	Push-Ups (Standard / Deficit) [CHEST]	bodyweight	3 x 10	Bodyweight	60s	Maintain rigid plank line from crown of head to heels, squeezing glutes and core. • Lower until chest touches floor, elbows tracking back at 45 degrees.
4	Dumbbell Pullover [CHEST]	dumbbell	3 x 10	8 kg	60s	Rest upper back across bench with hips slightly lower than shoulders. • Hold dumbbell diamond-style with palms flat under top weight plate.
5	Pull-Ups / Chin-Ups [BACK]	bodyweight	3 x 10	Bodyweight	60s	Dead hang start with active shoulders engaged before initiating pull. • Drive elbows down and back to chest, bringing chin cleanly over bar.

DAY 5: FULL BODY - COMPOUND FOUNDATION

Full Body Comprehensive total body stimulation & core stabilization | ~45 mins | 5 Exercises

#	Movement / Muscle	Hardware	Sets x Reps	Target Load	Rest	Biomechanical Cues & Tempo
1	Incline Dumbbell Press [CHEST]	dumbbell	3 x 10	8 kg	60s	Set bench angle to 30-45 degrees to bias clavicular upper pecs. • Keep wrists neutral and slightly tuck elbows at 45-60 degrees.

5	Pull-Ups / Chin-Ups [BACK]	bodyweight	3 x 10	Bodyweight	60s	Dead hang start with active shoulders engaged before initiating pull. • Drive elbows down and back to chest, bringing chin cleanly over bar.

KAIZEN PROGRESSIVE OVERLOAD & FORM PROTOCOL

- RPE Benchmark: Maintain Rate of Perceived Exertion between 7.5 and 8.5 (leave 1-2 clean reps in reserve).
 - Progressive Overload Trigger: When all prescribed sets & reps are logged with RPE <= 7.5, advance load by +1kg to +2.5kg.
 - Controlled Eccentric Tempo: Lower every repetition under 2-3 seconds of tension. Avoid momentum and bounce.
 - Adaptation Sync: Use the live session logger in Kaizen to record performance; your next cycle will auto-calibrate.
