Aadhi Krish	Home Dumbbell & Bodyweight	General Athletic Fitness
EXPERIENCE	SCHEDULE FREQUENCY	TARGET DURATION
BEGINNER	5 Days / Week	45 Minutes / Session

HARDWARE ARSENAL (INVENTORY COMPLIANCE)

Adjustable Dumbbells Set [2.5kg, 5kg, 7.5kg, 10kg, 12.5kg, 15kg, 17.5kg, 20kg] • Adjustable Incline/Flat Bench • Doorway Pull-up & Dip Station • Loop & Tube Resistance Bands [5kg, 10kg, 15kg, 20kg, 25kg]

WEEKLY SCHEDULE BLUEPRINT

Day	Session Title	Focus & Muscle Targets	Duration	Volume
Day 1	Home Dumbbell - Upper Body Push & Pull	Dumbbell floor presses, horizontal rows, and core bracing	45 mins	5 movements
Day 2	Home Dumbbell - Lower Body Resilience & Core	Goblet squats, Romanian deadlifts, lunges & core stabilization	45 mins	5 movements
Day 3	Home Dumbbell - Delts, Arms & Hypertrophy	Overhead dumbbell pressing, lateral delts, curls, and kickbacks	45 mins	5 movements
Day 4	Rest & Mobility Routine	Rest & Muscle Recovery	Rest Day	-
Day 5	Home Dumbbell - Compound Conditioning & Core	High-density pushups, floor presses, squats, and core bracing	45 mins	5 movements
Day 6	Home Dumbbell - Posterior Chain & Back Specialization	Pull-up volume, dumbbell rows, hamstrings, and bicep volume	45 mins	5 movements
Day 7	Rest & Mobility Routine	Rest & Muscle Recovery	Rest Day	-

DAY 1: HOME DUMBBELL - UPPER BODY PUSH & PULL

~45 MINS • 5 MOVEMENTS

Target Focus: Dumbbell floor presses, horizontal rows, and core bracing

#	Movement / Muscle	Hardware	Sets x Reps	Target Load	Rest	Biomechanical Cues & Tempo
1	Incline Dumbbell Press [CHEST]	dumbbell	3 x 10	8 kg	60s	Set bench angle to 30-45 degrees to bias clavicular upper pecs. • Keep wrists neutral and slightly tuck elbows at 45-60 degrees.
2	Dips (Chest Focus) [CHEST]	bodyweight	3 x 10	Bodyweight	60s	Lean torso forward 30 degrees and allow elbows to flare slightly. • Lower until upper arms are roughly parallel to the floor.
3	Push-Ups (Standard / Deficit) [CHEST]	bodyweight	3 x 10	Bodyweight	60s	Maintain rigid plank line from crown of head to heels, squeezing glutes and core. • Lower until chest touches floor, elbows tracking back at 45 degrees.
4	Dumbbell Pullover [CHEST]	dumbbell	3 x 10	8 kg	60s	Rest upper back across bench with hips slightly lower than shoulders. • Hold dumbbell diamond-style with palms flat under top weight plate.
5	Pull-Ups / Chin-Ups [BACK]	bodyweight	3 x 10	Bodyweight	60s	Dead hang start with active shoulders engaged before initiating pull. • Drive elbows down and back to chest, bringing chin cleanly over bar.

DAY 2: HOME DUMBBELL - LOWER BODY RESILIENCE & CORE

~45 MINS • 5 MOVEMENTS

Target Focus: Goblet squats, Romanian deadlifts, lunges & core stabilization

#	Movement / Muscle	Hardware	Sets x Reps	Target Load	Rest	Biomechanical Cues & Tempo
1	Bulgarian Split Squat [LEGS]	dumbbell	3 x 10	8 kg	60s	Place top of rear foot flat on bench behind you; take comfortable stride forward. • Drop straight down into hips until back knee hovers an inch above floor.
2	Walking Dumbbell Lunges [LEGS]	dumbbell	3 x 10	8 kg	60s	Take long, deliberate strides with feet tracing railroad tracks. • Lower trailing knee gently toward floor while front knee tracks over toes.
3	Hanging Leg / Knee Raise [CORE]	bodyweight	3 x 10	Bodyweight	60s	Hang from pullup bar with active shoulders, preventing pendulum swing. • Posteriorly tilt pelvis and raise knees/legs toward chest using lower abs.
4	Standard Forearm Plank [CORE]	bodyweight	3 x 10	Bodyweight	60s	Elbows positioned directly under shoulders, forearms parallel. • Engage quadriceps, squeeze glutes, and pull belly button up toward spine.
5	Russian Twists [CORE]	dumbbell	3 x 10	5 kg	60s	Sit on floor with knees bent and torso leaned back at 45 degrees in V-sit. • Hold dumbbell or medicine ball close to chest; rotate ribcage side to side.

DAY 3: HOME DUMBBELL - DELTS, ARMS & HYPERTROPHY

~45 MINS • 5 MOVEMENTS

Target Focus: Overhead dumbbell pressing, lateral delts, curls, and kickbacks

#	Movement / Muscle	Hardware	Sets x Reps	Target Load	Rest	Biomechanical Cues & Tempo
1	Seated Dumbbell Shoulder Press [SHOULDERS]	dumbbell	3 x 10	5 kg	60s	Sit with back supported, feet planted firmly on floor. • Hold dumbbells at ear level with elbows slightly angled forward (not flared 90 degrees).
2	Dumbbell Lateral Raise [SHOULDERS]	dumbbell	3 x 10	5 kg	60s	Lean forward 5-10 degrees at hips; start with dumbbells slightly in front of thighs. • Raise arms in scapular plane leading with elbows.
3	Arnold Dumbbell Press [SHOULDERS]	dumbbell	3 x 10	5 kg	60s	Start with dumbbells at chin height with palms facing chest. • Rotate palms forward as you press dumbbells upward in a fluid spiral motion.
4	Bent-Over Rear Delt Flyes [SHOULDERS]	dumbbell	3 x 10	5 kg	60s	Hinge torso parallel to floor with neutral spine and slight knee bend. • Sweep dumbbells out wide like wings, leading with pinkies and rear delts.
5	Dumbbell Front Raise [SHOULDERS]	dumbbell	3 x 10	5 kg	60s	Stand tall with core braced and dumbbells resting on front of thighs. • Raise one or both arms straight forward to eye level with controlled tempo.

DAY 5: HOME DUMBBELL - COMPOUND CONDITIONING & CORE

~45 MINS • 5 MOVEMENTS

Target Focus: High-density pushups, floor presses, squats, and core bracing

#	Movement / Muscle	Hardware	Sets x Reps	Target Load	Rest	Biomechanical Cues & Tempo
1	Incline Dumbbell Press [CHEST]	dumbbell	3 x 10	8 kg	60s	Set bench angle to 30-45 degrees to bias clavicular upper pecs. • Keep wrists neutral and slightly tuck elbows at 45-60 degrees.
2	Dips (Chest Focus) [CHEST]	bodyweight	3 x 10	Bodyweight	60s	Lean torso forward 30 degrees and allow elbows to flare slightly. • Lower until upper arms are roughly parallel to the floor.
3	Push-Ups (Standard / Deficit) [CHEST]	bodyweight	3 x 10	Bodyweight	60s	Maintain rigid plank line from crown of head to heels, squeezing glutes and core. • Lower until chest touches floor, elbows tracking back at 45 degrees.
4	Dumbbell Pullover	dumbbell	3 x 10	8 kg	60s	Rest upper back across bench with hips

#	Movement / Muscle	Hardware	Sets x Reps	Target Load	Rest	Biomechanical Cues & Tempo
	[CHEST]					slightly lower than shoulders. • Hold dumbbell diamond-style with palms flat under top weight plate.
5	Bulgarian Split Squat [LEGS]	dumbbell	3 x 10	8 kg	60s	Place top of rear foot flat on bench behind you; take comfortable stride forward. • Drop straight down into hips until back knee hovers an inch above floor.

DAY 6: HOME DUMBBELL - POSTERIOR CHAIN & BACK SPECIALIZATION
~45 MINS • 5 MOVEMENTS

Target Focus: Pull-up volume, dumbbell rows, hamstrings, and bicep volume

#	Movement / Muscle	Hardware	Sets x Reps	Target Load	Rest	Biomechanical Cues & Tempo
1	Pull-Ups / Chin-Ups [BACK]	bodyweight	3 x 10	Bodyweight	60s	Dead hang start with active shoulders engaged before initiating pull. • Drive elbows down and back to chest, bringing chin cleanly over bar.
2	One-Arm Dumbbell Row [BACK]	dumbbell	3 x 10	8 kg	60s	Place same-side hand and knee on bench, opposite foot wide on the floor. • Pull dumbbell in an arc towards your hip pocket, keeping elbow tight.
3	Bulgarian Split Squat [LEGS]	dumbbell	3 x 10	8 kg	60s	Place top of rear foot flat on bench behind you; take comfortable stride forward. • Drop straight down into hips until back knee hovers an inch above floor.
4	Walking Dumbbell Lunges [LEGS]	dumbbell	3 x 10	8 kg	60s	Take long, deliberate strides with feet tracing railroad tracks. • Lower trailing knee gently toward floor while front knee tracks over toes.
5	Incline Dumbbell Curl [BICEPS]	dumbbell	3 x 10	5 kg	60s	Set bench to 45-60 degrees and lean back, letting arms hang fully perpendicular. • Supinate wrists as you curl dumbbells upward, keeping upper arms motionless.

KAIZEN PROGRESSIVE OVERLOAD & FORM PROTOCOL

- RPE Benchmark: Maintain Rate of Perceived Exertion between 7.5 and 8.5 (leave 1-2 clean reps in reserve).
 - Progressive Overload Trigger: When all prescribed sets & reps are logged with RPE <= 7.5, advance load by +1kg to +2.5kg.
 - Controlled Eccentric Tempo: Lower every repetition under 2-3 seconds of tension. Avoid momentum and bounce.
 - Adaptation Sync: Use the live session logger in Kaizen to record performance; your next cycle will auto-calibrate.
